06 TEA INDUSTRY PERFORMANCE
IN 2024

13 SRI LANKA MACROECONOMIC
UPDATE - 2024

16 OUTLOOK
FOR THE YEAR 2025

TEA INDUSTRY PERFORMANCE IN 2024

Overview

The year 2024 continued to show promise as Sri Lanka progresses on its path to economic recovery encouraged by positive developments.

Reflecting on significant events from the past year, both locally and globally, 2024 could be aptly called ‘The Year of Reclaiming.’ In a historic milestone, Sri Lanka elected its first president from outside of the traditional ruling parties since gaining independence in 1948.

The momentum in tea value, which began building in the latter part of the previous year, was evident across all elevations. This growth was driven by moderate crop intake and production during the first 2 quarters. The appreciation of the rupee significantly influenced price corrections in the 3rd quarter, after which prices remained firm.

The Western and Uva quality seasonal teas were well-received, driven by steady prices and strong demand for the better-quality teas, whilst the others eased selectively. Low Grown teas experienced a similar trend demand-wise and the volatility in the currency continued to impact on rupee tea prices.

TEA INDUSTRY PERFORMANCE IN SUMMARY – 2024

- **Production** – An increase of 6 M/Kgs (2.4%) year-on-year, with total national production recorded at 262.16 M/Kgs.
 - **Tea exports** – Total Exports recorded an increase of 3.87 M/Kgs (1.6%) year-on-year, with a total of 245.78 M/Kgs.
 - **Tea export earnings** - Totalled Rs. 433.4 bn vis-à-vis Rs. 428.2 bn in 2023. An increase of Rs. 5.18 bn (1.2%).
 - **Auction averages/prices** – Total Colombo Auction average achieves USD 4.06 per kg, recording the highest ever annual auction average in USD terms - marginally surpassing the previous high of USD 4.05 per kg established in 2017.
- National Average for the year 2024 was Rs. 1,225.17, an increase of Rs.53.88 and USD 0.47 in USD compared to the year 2023 average of Rs. 1,171.29.

WORLD AUCTION PRICES IN USD - 2015 TO 2024

(Source – Forbes & Walker Research)

01ST QUARTER 2024

Production: Q1 for the year 2024 recorded a total of 58.27 M/Kg, a decline of 1.24 M/Kgs vis-à-vis 59.51 M/Kgs recorded in the corresponding period of 2023. Auction

Averages/Prices: Tea Sale average for the 1st Quarter declined against the same period in the previous year, with the auction average for the period at Rs.1,286.99 recording a Rs.108.57 decrease vs. Rs. 1,395.56 of January-June 2023.

Exports: Revenue earned for Q1 of Rs. 110.91 Bn recorded an increase of Rs. 0.69 Bn year-on-year incomparison with January-March 2023 earnings of Rs. 110.22 Bn.

Q1	Production - Kg			Auction Price - Rs.			Export Revenue - Rs.			FOB Price - Rs.		
	FY 2023	FY 2024	VARIANCE	FY 2023	FY 2024	VARIANCE	FY 2023	FY 2024	VARIANCE	FY 2023	FY 2024	VARIANCE
	59.51 Million	58.27 Million	↓ (1.24)	1,395.56	1,286.99	↓ (108.57)	110.22 Billion	110.91 Billion	↑ 0.69	2,038.04	1,779.43	↓ (258.61)

2ND QUARTER 2024

Production: April-June 2024 recorded a total of 69.33 M/Kgs, showing a negative variance of 5.82 M/Kgs vis-à-vis 75.15 M/Kgs recorded in the same period of 2023.

Auction Averages/Prices: Q2 auction price witnessed an increase of approximately 16% and recorded a sale average of Rs. 1,243.53 vis-à-vis Rs. 1,069.84 in the corresponding period of 2023. This was mainly due to the lower to moderate production in the given period.

Exports: Revenue earnings for the 2nd Quarter witnessed a significant increase and totalled Rs. 99.70 Bn incomparison with previous year's figure of Rs. 110.04 Bn. This was mainly owing to the improvement in demand mostly from the Middle East/Euro-Asian sectors, with a comparative increase in freight charges in other tea producing regions against Sri Lanka.

Q2	Production - Kg			Auction Price - Rs.			Export Revenue - Rs.			FOB Price - Rs.		
	FY 2023	FY 2024	VARIANCE	FY 2023	FY 2024	VARIANCE	FY 2023	FY 2024	VARIANCE	FY 2023	FY 2024	VARIANCE
	75.15 Million	69.33 Million	↓ (5.82)	1,069.84	1,243.53	↑ 173.69	99.70 Billion	110.04 Billion	↑ 10.34	1,714.94	1,761.84	↑ 46.90

3RD QUARTER 2024

Production: July-September 2024 recorded a total of 68.62 M/Kgs, an improvement of 9.79 M/Kgs vis-à-vis 58.83 M/Kgs recorded in the same period of 2023.

Auction Averages/Prices: Q3 Auction Price witnessed an increase of Rs.115.62, recording a Sale Average of Rs.1,207.98 vis-à-vis Rs. 1,092.36 in the corresponding period of 2023.

Exports: Revenue earnings for the 3rd Quarter showed a decline in comparison with previous year's figure of Rs. 113.97 Bn vis-à-vis Rs. 112.37 Bn of July-September 2023. Domestic issues faced within major importer countries mostly impacted by currency fluctuations affected tea prices in the quarter gone-by.

4TH QUARTER 2024

Production: Q4 recorded a total of 65.94 M/Kgs, showing a positive variance of 3.35 M/Kgs vis-à-vis 62.59 M/Kgs recorded in the same period of 2023. The Total production for the year was recorded at 262.16 M/Kgs, an increase of 6.07 M/Kgs vis-à-vis 256.09 M/Kgs at the end of 2023.

Auction Averages/Prices: Auction Prices continued to witness an increase with price improvement of Rs.26.49 with a sale average of Rs.1,165.16 vis-à-vis Rs. 1,138.67 in the corresponding period of 2023.

The year closed with the total national average at 1,225.17, recording a positive variance of Rs.53.88 against the corresponding year's average of 1,171.29

Exports: Revenue earnings for Q4 totalled Rs. 110.14 Bn vis-à-vis Rs. 104.4 Bn (an increase of Rs. 5.74 Bn). Total Export Revenue for the year 2024 was recorded at Rs. 433.47 Bn, an increase of 5.18 Bn compared with the previous year's revenue of Rs. 428.29 Bn. F.O.B Value recorded for the year stood at Rs.1,763.61, a marginal decline of Rs. 6.83 vis-à-vis Rs.1,770.44 of 2023.

COMPARISON OF THE PERCENTAGE SHARE OF WORLD TEA PRODUCTION (2015 VS. 2024)

PERCENTAGE SHARE OF WORLD PRODUCTION OF TEA 2015

PERCENTAGE SHARE OF WORLD PRODUCTION OF TEA 2024

COMPARISON OF WORLD EXPORTS OF TEA (2015 VS. 2024)

WORLD EXPORTS OF TEA 2015

WORLD EXPORTS OF TEA 2024

● Sri Lanka ranked No. 2 amongst world tea exporting countries in 2015 and declined to the 3rd position by 2023.

● In 2024, India moved up to the 3rd position at 14% and Sri Lanka declined to the 4th position with 13%.

The import of other origin teas for re-export into India would have perhaps made up the difference.

SRI LANKA MACROECONOMIC UPDATE - 2024

Sri Lanka restored stability and travelled a path of growth after the severe and unprecedented economic crisis in 2022 and 2023. The implementation of key structural and policy reforms such as floating the currency, removal of subsidies, domestic debt restructure, the long-awaited restructure of the ISB’s and cost-based pricing on state owned enterprises (SOE) helped stabilise the economy which then moved to a growth trajectory since mid-2023. However, the restructure of some of the key SOEs and brining in measures to attract FDI remains to be done perhaps in the new year. The last four quarters have shown economic growth, after significant negative growth in the previous two years. The positive growth, low inflation, a steady exchange rate, and improved fiscal and external balances throughout 2024 amid the continued external debt service suspension was the best economic performance we have seen since the Covid pandemic. However, the recovery remains fragile and hinges on the continuation of the reforms that can strengthen prospects for medium-term growth. It is said that poverty remains high and Labour force participation continues to decline.

TABULATED BELOW ARE KEY ECONOMIC INDICATORS

Agriculture Sector Performance

Sri Lanka’s gross domestic product expanded by 4.7% in the second quarter with the agriculture sector expanding by 1.7% in the quarter from the previous year. Analysing Agricultural Production up to August 2024, it is observed that YOY Tea, Fish and Paddy production has increased, however Rubber and coconut production has declined compared to the last.

Interest Rates

Interest rates on borrowings reduced significantly in 2024 with the key Average Weighted Prime Lending Rate (AWPLR) reducing 483 basis points from a year ago.

	2024	Year Ago	% Change
91 day Treasury bill rate - % (30th Dec)	9.35	16.10	-72%
AWPLR (30th Oct)	9.05	13.88	-53%
AWDR (Dec)	7.61	12.75	-67%

Source - Central Bank of Sri Lanka

Exchange Rates

Sri Lankan Rupee which exhibited some volatility initially with depreciation pressure lingering, saw a clear appreciation towards the 2nd half of the year which was halted only by the CBSL accumulating USD reserves by buying dollars from the market.

Meanwhile, reflecting cross-currency movements, the Sri Lanka Rupee appreciated against other major currencies, such as stated below during the year up to 29 November 2024. A 10% appreciation of the currency against the US Dollar and a 26% appreciation against the Ruble could impact future tea prices.

Currency	29th November 2024	30th December 2023	% Appreciation / Depreciation
USD	290.9179	323.9233	10.19%
Euro	307.5148	358.7451	14.28%
Sterling Pound	369.6548	412.6135	10.41%
Russian Rouble	2.6937	3.6612	26.43%
Iranian Riyal	0.0069	0.0077	10.39%
Turkish Lira	8.33969	10.9274	23.68%
Ukraine Hryvnia	6.90362	8.43637	18.17%
Japanese Yen	1.9344	2.2911	15.57%
Chinese Yuan (Renminbi)	40.2070	45.6693	11.96%
Saudi Riyal	77.4408	86.3819	10.35%

GLOBAL SUPPLY AND DEMAND

In analysing the global tea production statistics, it is evident that the African Region has continued to record an increase in production, whilst notable declines would be from Bangladesh and India – particularly from the North Indian Region which records almost a negative 60 M/Kgs year-on-year. World tea production statistics available up to October/November 2024 indicates a deficit of around 40 M/Kgs year-on-year. However, this shortfall, which is of CTC origin, would have minimal impact on the Sri Lankan tea industry.

Sri Lanka has closed the year 2024 having recorded a total of 262.16, an increase of 6 M/Kgs year on year. Notwithstanding that the country's production was well in excess of 300 M/Kgs a decade ago, in the more recent past the industry has been struggling to achieve even a 300 M/Kgs which would be the requirement for the supply of Ceylon Teas to its traditional markets.

Global tea production has been increasing by around 2.6 %, whilst global consumption has been growing by around 2.5%. Therefore, it is evident that if there is an excess/surplus of tea and it would be reasonably conclusive that this excess would comprise of average/poor-quality teas, particularly considering the volume of tea which remains

unsold from the African Region over a long period of time arising from a minimum price that has been in force for these teas. We are reliably informed that the minimum price has now been done away with and the stocks of old teas are being released to the market.

Tea consumption in India, which accounts for about 20% of global demand, is expected to rise by 3%-4% over the next 2-3 years. This presents a significant opportunity for Sri Lankan tea due to its close proximity and trade relations.

Chinese consumption is likely to grow with a preference for black tea. The market for quality loose tea is expected to dominate, despite the rise in ready-to-drink products before the pandemic.

Iran shows promise for tea prices, particularly with the recent 'Tea for Oil' deal with Sri Lanka.

Perhaps a concerning factor may be, a decline in tea consumption from Russia due to economic struggles and sanctions. Türkiye, with a saturated market and high per capita consumption, may experience stagnation in imports due to economic challenges.

OUT LOOK FOR THE YEAR 2025

From a Sri Lankan perspective, consequent to the decline in tea crop over the last several years and the 2024 deficit in Indian tea production, there is possibly a shortfall created or tight supply situation of Orthodox Large Leaf teas.

In addition, the 1st quarter being a lean cropping period in most producer countries, combined with Sri Lanka experiencing its Western quality season, we could predict tea prices to remain buoyant during Q1 and perhaps even in the first half of Q2. Thereafter, much would depend on the supply dynamics of world tea production.

Needless to say, the parity of the SLR vs. USD, particularly as the country intends to gradually relax the restrictions on import of vehicles etc., will also impact rupee tea prices.

However, factors such as climate change, input costs, mechanization & wages, Government policies and use of fertilizer etc., affecting tea production in Sri Lanka would enable us to project with cautious optimism an annual 280 M/Kgs for the year 2025.

WORLD PRODUCTION AND APPARENT CONSUMPTION OF TEA (THOUSAND METRIC TONS)
This graph should be looked upon as a guide

In summary, whilst economic challenges and weather uncertainties could impact overall market dynamics, differentiation would be a key factor for the future of Ceylon Tea. The industry needs to capitalise on the strengths continuing to be a global leader in premium and sustainable tea.

1ST QUARTER

WEATHER

The Western and Nuwara Eliya regions reported generally bright and sunny weather, with occasional misty mornings, frosty conditions, and evening showers. Some periods witnessed increased wind speeds and potential afternoon showers.

CROP

Western, Uva, Udapussellawa and Nuwara Eliya regions crop intake fluctuated, with some weeks reporting declines and others showing maintenance or increases. In the low grown region crop intake remained stable in some weeks, while declines were noted in others.

2ND QUARTER

WEATHER

The Western and Nuwara Eliya regions experienced a mix of sunny mornings and frequent evening showers. Some weeks reported heavy rainfall and windy conditions, particularly in late May and June. Uva and Udapussellawa regions generally had bright weather with occasional showers. In May, persistent rain was reported, while June saw more sunny and windy conditions. Low-grown region alternated between bright mornings and frequent evening showers, with some weeks experiencing heavy rain.

CROP

Crop intake increased in most regions, except for a slight decline in the Western Region in the month of April. Fluctuating crop intake in early May saw increases in Uva and Low Grown regions, while later weeks reported decreases in Western, Nuwara Eliya, and Low Grown regions. The Western, Udapussellawa, and Low Grown regions saw an increase, while Uva and Nuwara Eliya regions maintained stable intake towards the latter part of the quarter.

3RD QUARTER

WEATHER

Western and Nuwara Eliya regions reported generally bright weather with intermittent showers throughout the period. Some weeks had heavy rain and windy conditions, particularly in July and September. Uva/Udapussellawa Regions reported predominantly sunny weather with occasional showers. Rain was forecasted for several weeks, particularly in September. Bright mornings with sporadic evening showers were common. Heavy rain was reported in some weeks, particularly in August and September in the low grown region.

CROP

Crop intake was stable in most regions, with a slight decline in Udapussellawa and Low Grown regions at the commencement of the quarter. The latter part of the quarter reported mixed results, with increases in Low Grown and Udapussellawa regions, while Uva and some other regions showed declines in crop intake.

4TH QUARTER

WEATHER

Western and Nuwara Eliya regions reported a mix of bright weather and intermittent showers. Some weeks had continuous rain, while December saw mostly clear weather with occasional misty conditions. Uva/Udapussellawa Regions reported sunny weather with occasional evening showers. Rainfall increased in some weeks, particularly in November and December. Intermittent showers and rain were reported throughout, with misty conditions expected in December in the low grown region.

CROP

Crop intake remained stable in most regions, with some decreases in Uva, Udapussellawa, and Low Grown regions at the commencement of the quarter whilst the crop intake was inconsistent, with a decrease in early December, followed by an increase in the latter part of the quarter.
