World Tea News

Regular 'Black' Tea is still No. 1 in UK

The nation's favourite traditional brew is holding strong in the popularity stakes among Brits – world renowned for being a nation of tea lovers.

As a nation with a long history of tea drinking, for 71% traditional black tea, with or without milk, holds strong, with one in six (16%) more likely to opt for herbal infusion, and one in eight (13%) predominantly choosing green tea.

Some noteworthy differences between the older and younger generations - among the 18-24 age group, two thirds (63%) mainly drink black tea, while around a fifth (20%) are experimenting with a range of herbal infusions or drinking green tea. The 65+ age group, over four fifths (86%) mainly drink black tea, but fewer than one in 10 choosing herbal or green tea.

Additionally, more women than men were likely to deviate from tradition when it comes to their main brew of choice, with one in five women (19%) opting for herbal infusions compared to just one in eight (12%) men.

However, the vast majority across all the age groups (93% overall) prefer the convenience of making their brew with a tea bag rather than preparing a loose-leaf infusion.

Although younger generations are experimenting with a range of teas, the nation's favourite is still a traditional brew of regular black tea.

DEMAND: - Good demand.
